Subject: PS

I have heard that it is being considered to give perfect proximity to sites in redevelopment areas.

We have a site in a CRA area - and it has perfect proximity. Please don't buy the argument that redevelopment areas cannot get perfect proximity. It is important to have a school, grocery and bus stop near affordable housing, whether you are a public housing site or a redpvt site or any site. To allow housing to be built that is not near those three items is to shortchange future residents who then will have access issues to schools, grocery and bus stop.

Thanks for your time and attention to this matter.
