

Disaster Damage Survey Instructions

Florida Housing requests a general assessment of damage that results from Hurricane Michael. A link to Damage Survey Template is below for use by owners and/or managers of rental developments that participate in Florida Housing programs.

Save the attached file "Damage_Survey_Form_Michael_10_08_18.xls", enter the applicable information, and submit the completed report as soon as practical (ideally within 5 business days after the storm) to HDR@floridahousing.org

Please report the quantity of buildings damaged and the quantity of units affected as well as the number of households displaced by the damage.

Specific detail regarding damages is not being sought at this time, but we ask that you review the damage descriptions that follow and use them to provide a general assessment of damage that resulted from Hurricane Irma by selecting the estimated damage level (for the development overall) from the dropdown list:

- NONE- No damage as a result of Michael
 - LIMITED: Generally superficial damage to solid structures (e.g., loss of tiles or roof shingles); some mobile homes and light structures are damaged or displaced.
 - MODERATE: Solid structures sustain exterior damage (e.g., missing roofs or roof segments); some mobile homes and light structures are destroyed, many are damaged or displaced.
 - EXTENSIVE: Some solid structures are destroyed; most sustain exterior and interior damage (e.g., roofs missing, interior walls exposed), most mobile homes and light structures are destroyed.
 - CATASTROPHIC: Most solid and all light or mobile structures destroyed.

In addition to the severity of the impact, Indicate the nature of the damage by placing an "X" in the applicable column:

- Damage due to Rising Water (flood),
- Damage to Roof/Soffit
- Damage to Windows
- Damage to Accessory Buildings and Amenities
- Damage to Landscape, trees, etc.
