GRANT AGREEMENT FOR MATCH FUNDING TO BE USED FOR
RESEARCH RELATED TO DEVELOPMENTS FUNDED TO SERVE HIGH
NEEDS/HIGH COST POPULATIONS
BETWEEN
FLORIDA HOUSING FINANCE CORPORATION
AND
CATHOLIC CHARITIES, DIOCESE OF ST. PETERSBURG, INC.

THIS GRANT AGREEMENT (this "Agreement") is made and effective as of
June 1, 2017 (the "Effective Date"), by and between FLORIDA
HOUSING FINANCE CORPORATION, a public corporation and a public body corporate
and politic duly created and existing under the laws of the State of Florida, and its
successors and assigns ("Florida Housing"), and CATHOLIC CHARITIES, DIOCESE OF
ST. PETERSBURG, INC., its successors and assigns (the "Grantee").

RECATALS

(a) Florida Housing issued RFP 2014-102 (the "RFP") on January 17, 2014, for
the purpose of providing funding for developments serving high needs/high cost
chronically homeless residents. The Grantee, one of the funding recipients under the RFP,
has constructed a high needs/high cost development known as "[name development]" (the
"Development"). Under the terms of the RFP, and in connection with award of the RFP
funds, the Grantee agreed to conduct a multi-year study (the "Multi-Year Study") to
quantify cost/benefit data showing what, if any, public savings occurred as a result of
housing the intended residents in its development. The multi-year study was also required
to provide a quantitative and qualitative evaluation of the residents' health, self-
sufficiency and other outcomes over the study period.

(b) At its meeting held on December 11, 2015, Florida Housing's Board of
Directors approved the award of a grant of up to $50,000 (the "Grant Funds") in match
funding to the Grantee to be used only for paying a portion of the costs of the Multi-Year
Study related to the Development.

(c) As a condition to disbursing the Grant Funds to the Grantee, Florida
Housing and the Grantee have determined to enter into this Agreement in which they set
forth the terms and conditions governing the Multi-Year Study and the disbursement and
use of the Grant Funds.

NOW, THEREFORE, in consideration of the mutual covenants and undertakings
set forth herein, and other good and valuable consideration, the receipt and sufficiency of
which is hereby acknowledged, Florida Housing and the Grantee do hereby contract and
agree as follows:
AGREEMENT

1. INCORPORATION OF RECITALS; DEFINITIONS. The above recitals are true and correct and are incorporated into and made a part hereof. Any term not otherwise defined in this Agreement shall have the meaning set forth in the RFP. The terms and conditions of the RFP as published on Florida Housing’s website are incorporated herein by reference.

2. AGREEMENT TO CARRY OUT MULTI-YEAR STUDY; AGREEMENT TO DISBURSE GRANT FUNDS.

(a) The Grantee agrees to carry out the Multi-Year Study in accordance with the RFP and this Agreement, to report the results of such study, and to provide such other deliverables, to Florida Housing, all in the manner and upon the terms and conditions of this Agreement.

(b) In return, Florida Housing agrees to disburse the Grant Funds to reimburse eligible costs incurred and paid by the Grantee in conducting the Multi-Year Study, subject to and in accordance with the terms and conditions of this Agreement.

3. MULTI-YEAR STUDY; PARAMETERS; COMPLETION DATE; FINAL REPORT.

(a) The Grantee agrees to partner with experienced researchers to engage in the Multi-Year Study to quantify cost/benefit data showing what, if any, public savings have occurred as a result of housing the intended residents in the Development.

(b) The study must also provide a quantitative and qualitative evaluation of the residents’ health and other outcomes over the study period.

(c) While resident participation in the study is voluntary, Florida Housing expects all residents in the Development to be included as study participants.

(d) The study period must include at least two years of resident data for the period post occupancy.

(e) The Multi-Year Study must be completed and a final report, satisfactory in form and content, acceptable to Florida Housing detailing the results must be issued on or before the termination date set forth in Section 5 of this Agreement.

4. METHODOLOGY; INFORMATION TO BE PROVIDED.

It shall be a condition to Florida Housing’s disbursing any Grant Funds hereunder that the Grantee shall have provided to Florida Housing, for review and approval, the following information with respect to the Grantee’s Multi-Year Study:
(a) A significantly developed methodology for review and comment before loan closing, a copy of which is attached hereto as \textbf{Exhibit A}. The description of the study design must include the following elements:

- The objectives of the study;
- The questions that researchers will be studying;
- The method by which the demographic data will be collected;
- The method by which the cost data will be collected;
- The entity or entities performing the demographic data collection;
- The entity or entities performing the cost data collection;
- The method by which the data will be compiled and analyzed;
- Describe how each resident’s outcomes will be measured;
- If the study is to be part of a broader High Needs/High Costs study carried out for the community in which the Development is located, describe the following:
  - The objectives of the broader study;
  - How the study parameters for this RFA fit into the broader study;
  - How the data and analysis for the study will be managed within the broader study;
- For the residents’ participating in the study, describe how the quantitative and qualitative outcomes will be measured and evaluated; and
- Describe the key roles and responsibilities of each of the research entities that will be a contributor to the study including, but not limited to, universities, local and state government agencies, healthcare providers, homeless coalitions and lead agencies, and supportive services providers.

(b) Provide a copy of an executed contract/agreement between the Grantee and the principal research organization (the organization that will be leading the research) outlining the scope of work, roles and responsibilities of each party, and the agreed upon deliverables, a copy of which is attached hereto as \textbf{Exhibit B}.

(c) Describe the experience of the principal organization that is responsible for the coordination and implementation of the study and/or provide a resume or curriculum vitae that describes the qualifications of the lead researcher for the principal research organization, a copy of which is attached hereto as \textbf{Exhibit C}.

(d) Describe the other funding sources to be used to fund and provide match for the study, a copy of which is attached hereto as \textbf{Exhibit D}.

(e) Provide a timeline for the completion of the study, a copy of which is attached hereto as \textbf{Exhibit E}.
5. TERM OF AGREEMENT.

Funding through this Agreement shall be available to the Grant Recipient beginning on the Effective Date and continuing until midnight, October 31, 2020. If not renewed as provided herein, this Agreement shall terminate on that date (the “Termination Date”). If the parties mutually agree in writing, the Agreement may be renewed once for an additional period not to exceed one (1) year. The renewal is at the discretion of Florida Housing, and shall be contingent upon Florida Housing’s assessment of satisfactory progress by the Grantee in carrying out the Multi-Year Study by means of participation by the Grantee in telephonic update meetings and telephonic or in-person peer meetings conducted by Florida Housing from time to time during the term of this Agreement, as well as Florida Housing’s evaluation of deliverables and interim progress reports submitted by the Grantee as provided elsewhere in this Agreement.

6. MATCH FUNDS; GRANT FUNDS RESTRICTIONS.

(a) The amount of Grant Funds is up to $50,000.

(b) For every one dollar ($1.00) in Grant Funds provided by Florida Housing under this Agreement, the Grantee must provide at least two dollars ($2.00) in match funds from the Grantee’s own or other sources that is designated and used specifically for the Multi-Year Study.

(c) It shall be a condition to Florida Housing’s disbursing Grant Funds hereunder that the match requirement be satisfied to the extent necessary to support the amount of Grant Funds requested and that the match funds were used to pay for eligible Multi-Year Study services and expenses as evidenced by invoice and/or other documentation acceptable to Florida Housing in order to draw upon the Grant Funds. The supporting documentation shall include the Grantee’s written certification(s), in form and content acceptable to Florida Housing, certifying that the costs and expenses were incurred and paid by the Grantee in carrying out the Multi-Year Study and that such costs and expenses are eligible for reimbursement with Grant Funds under the terms of this Agreement. A copy of the written certification form is attached hereto as Exhibit F.

(d) If a state university is part of the Grantee’s research team, the indirect cost percentage assessed by that university must be limited to no more than 10 percent for the portion of the work carried out that is funded through this Agreement.

(e) The Grant Funds may not be used by the Grantee to pay for the Grantee’s internal staff or operations related or unrelated to the Multi-Year Study, even if Grant Funds would be used to pay for the staff’s time on the Multi-Year Study.
7. **USE OF GRANT FUNDS; DISBURSEMENT OF GRANT FUNDS; INTERIM PROGRESS REPORTS; FINAL REPORT.**

(a) Subject to the terms of this Agreement, the Grant Funds may be used only to reimburse eligible costs and expenses incurred and paid by the Grantee in carrying out the Multi-Year Study as set forth below.

(b) The Grant Funds shall be used to reimburse the Grantee for eligible costs incurred and paid by the Grantee for the Multi-Year Study, including those costs incurred and paid by the Grantee prior to the Effective Date of this Agreement provided such costs are otherwise eligible costs incurred and paid by the Grantee for the Multi-Year Study. The Grant Funds will be issued in draws based upon written requests ("funding requests") submitted by the Grantee from time to time during the term of this Agreement. Each funding request shall include one or more invoices together with evidence of payment of same by the Grantee, the deliverables related to the invoice(s) or, if no deliverables, a description of the work or services carried out in connection with the Multi-Year Study, the certification required under Section 6. (c) above, and an interim progress report detailing the status of the Multi-Year Study and its stage of completion as a percentage with 100% representing the completion of the study and issuance of the final report. Upon approval of the funding request, Florida Housing will reimburse the Grantee one-third of the amount of the paid invoice(s) supporting the funding request (the remaining two-thirds represent the Grantee’s match funds).

(c) Disbursement of the Grant Funds shall at all times be subject to the following conditions:

i. Florida Housing’s determination that satisfactory progress is being made by the Grantee toward completion of the Multi-Year Study consistent with the amount of Grant Funds advanced to date as evidenced by phone conference discussions with the Grantee and the interim progress reports submitted by the Grantee to Florida Housing.

ii. There being no default by the Grantee under this Agreement.

(d) The foregoing notwithstanding, 10% of the Grant Funds ($5,000) shall be withheld pending Grantee’s completion of the Multi-Year Study and submission of the final report to Florida Housing.

8. **COVENANTS AND AGREEMENTS OF THE GRANTEE.** The Grantee covenants and agrees, during the term hereof, as follows:

(a) That the Grantee shall use the Grant Funds only for the purposes authorized herein and for no other purpose.
(b) That the Grantee shall conduct and carry out or cause to be conducted and carried out the Multi-Year Study in accordance with the methodology submitted to and approved by Florida Housing.

(c) That the Grantee shall adhere to the timeline (Exhibit E) submitted to and approved by Florida Housing for completion of the Multi-Year Study and, in all events, complete or cause to be completed the Multi-Year Study and issue or cause to be issued the final report on or before the Termination Date set forth in Section 5 of this Agreement.

(d) That the Grantee shall promptly notify Florida Housing of any failure or inability of the Grantee to perform any covenant or obligation applicable to it under this Agreement.

(e) That the Grantee shall promptly return or repay to Florida Housing, upon demand and within the time provided for payment, any Grant Funds subject to recapture under this Agreement.

(f) That from time to time during the term of this Agreement, upon the request of Florida Housing, the Grantee shall report either in writing or by phone conference the status of the Multi-Year Study, including but not limited to, the work done and results to date, the status of any deliverables, work remaining to be done, and estimated completion date.

9. WARRANTIES AND REPRESENTATIONS. The Grantee represents and warrants to and in favor of Florida Housing, and agrees (which representations, warranties and agreements shall be deemed continuing) as follows:

(a) The Grantee (i) is a Florida non-profit corporation, validly existing under the laws of the State of Florida; (ii) has all the necessary power and authority to enter into and carry out the terms of this Agreement; and (iii) by proper action has duly authorized the execution, delivery and performance of this Agreement in all respects.

(b) The Grant Funds shall be used solely for the purpose and in the manner authorized in this Agreement.

(c) The Grantee has partnered with experienced researchers to engage in the Multi-Year Study to quantify cost/benefit data showing what, if any, public savings have occurred as a result of housing the intended residents in the Development.

(d) The Grantee will comply, continuously and promptly, with all federal, state and local laws, ordinances and regulations relating to the subject matter of this Agreement.

(e) The Grantee shall, during the term of this Agreement and thereafter for a period not less than 1 year, maintain a file copy of all documents and materials related to this Agreement and the Multi-Year Study, and further shall make such documents and
materials available for inspection by Florida Housing and/or its designated agents during regular business hours.

10. **RECAPTURE.** The Grant Funds shall be subject to recapture by Florida Housing if, at any time during the term of this Agreement or within five years following its termination, Florida Housing determines that the Grant Funds were used for any purpose or in any manner not permitted or authorized under this Agreement or that the Grant Funds were awarded or disbursed to Grantee based upon fraud or misrepresentation committed by the Grantee. Recapture under this Section 10 shall be in addition to any remedies available to Florida Housing as provided elsewhere in this Agreement. If Florida Housing elects to exercise its right to recapture the Grant Funds as provided in this paragraph, it shall notify the Grantee in writing, and the Grantee shall be obligated to repay the Grant Funds to Florida Housing upon demand no later than ten (10) business days following receipt of the notice. Recapture shall also be a remedy available to Florida Housing upon the occurrence of an Event of Default as defined below.

11. **DEFAULT.** Each of the following events shall constitute an "Event of Default":

   (a) If the Grantee fails to abide by any term or provision of this Agreement including, but not limited to, the failure to complete the Multi-Year Study and submit the final report within the time period(s) provided in this Agreement.

   (b) If Florida Housing determines that the Grantee has failed or ceased to conduct and carry out the Multi-Year Study in a timely and continuous manner, consistent with the required completion deadline, and such failure is not corrected to the reasonable satisfaction of Florida Housing within the cure period provided in Section 12 of this Agreement.

   (c) If there is filed by or against the Grantee a petition in bankruptcy or a petition for the appointment of a receiver or trustee of the property of the Grantee, or if Grantee files a petition for reorganization under any of the provisions of the United States Bankruptcy Code or of any similar law, state, federal, or foreign, or makes a general assignment for the benefit of creditors or makes any insolvency assignment or is adjudicated insolvent by any court of competent jurisdiction, any of which events, in the reasonable judgment of Florida Housing, will cause material interference with the Grantee’s performance of its obligations under this Agreement including the timely completion of the Multi-Year Study and submission of the final report.

   (d) If any warranty, representation, covenant or agreement made by the Grantee in this Agreement shall at any time be false or misleading in any material respect, or if the Grantee fails to keep, observe or perform any of the terms, covenants, agreements, representations or warranties contained in this Agreement.

   (e) If any warranty, representation, covenant or agreement made by the Grantee in any other agreement in which Florida Housing is a party, or a beneficiary under its terms, shall at any time be false or misleading in any material respect, or if the Grantee fails to
keep, observe or perform any of the terms, covenants, agreements, representations or warranties contained in any such agreement.

Florida Housing’s failure (or delay) to declare a default on any occasion shall not constitute a waiver of any such default or the waiver of the right to declare a default on any future occasion.

12. REMEDIES. Upon the happening of an Event of Default, Florida Housing may, at its option, upon written notice to the Grantee at the address stated in this Agreement, and in the event the Grantee does not cure such default (or take measures satisfactory to Florida Housing to cure such default), within ten (10) days after the date of notice, or within such further time Florida Housing may allow, without further notice, declare a default under this Agreement, and effective upon the date of such default, Florida Housing may:

(a) Cease disbursement of Grant Funds, and retain or de-obligate, in its reasonable discretion, any remaining Grant Funds.

(b) Apply to any court, county, state or federal, for any specific performance of this Agreement; for an injunction, which may be affirmative in nature, to remedy the default or violations of this Agreement; or for such legal or equitable relief as may be appropriate, the Grantee agreeing that the injury to Florida Housing arising from a default remaining uncured under any of the terms of this Agreement would be irreparable, and the amount of damage would be difficult to ascertain.

(c) Exercise any other rights or remedies as may be available to Florida Housing under applicable law, including the termination of this Agreement and retention of any remaining Grant Funds.

(d) Recapture the Grant Funds as provided in section 10 of this Agreement, and institute any actions or proceedings as may be necessary or appropriate in order to enforce recapture of the funds.

Florida Housing may invoke any remedy provided for herein in combination with any other remedy, the remedies provided herein being non-exclusive. Any delay or failure to invoke any remedy on one occasion shall not constitute a waiver of the right to invoke any such remedy in the future.

13. PUBLIC RECORDS. Pursuant to Section 119.0701(2)(b), Fla. Stat., the Grantee is required to comply with public records laws, specifically to:

a. Keep and maintain public records required by the public agency to perform the service.

b. Upon request from the public agency’s custodian of public records, provide the public agency with a copy of the requested records or allow the records to be
inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

c. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

d. Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the public agency’s custodian of public records, in a format that is compatible with the information technology systems of the public agency.

If the Grantee has questions regarding the application of Chapter 119, Florida Statutes, to the Grantee’s duty to provide public records relating to this Agreement, contact the Corporation Clerk at:

Corporation Clerk
Florida Housing Finance Corporation
227 N. Bronough Street, Suite 5000
Tallahassee, Florida 32301-1329
Phone: 850.488.4197
E-mail: Corporation.Clerk@floridahousing.org

14. INDEMNIFICATION. The Grantee shall indemnify and hold harmless Florida Housing, its directors, officers, members, officials, employees and agents (collectively, the “Indemnified Parties”), from any liability, claims or losses, including attorneys’ fees and costs, resulting from the disbursement of the Grant Funds to the Grantee or matters related to the conduct of the Multi-Year Study by the Grantee or its agents and contractors. This provision shall survive the term of this Agreement and shall continue in full force and effect so long as the possibility of such liability, claims, or losses exists.

15. LIABILITY; INDEPENDENT CONTRACTOR; NO AGENCY.

(a) Florida Housing shall not be deemed to have assumed any liability for the acts, omissions, or negligence of the Grantee, its agents, contractors, or employees, in connection with this Agreement and the Grantee specifically accepts responsibility for its acts, omissions or negligence and for the acts, omissions or negligence of its agents, contractors or employees, in connection with this Agreement and shall defend and hold
Florida Housing harmless from and against the claims of any party arising out of or claimed to arise out of any such acts, omissions, or negligence.

(b) The Grantee, together with its agents, suppliers, subcontractors, officers, and employees, shall have and always retain under this Agreement the legal status of an independent contractor, and in no manner shall they be deemed employees or agents of Florida Housing or deemed to be entitled to any benefits associated with such employment. During the term of this Agreement, the Grantee shall maintain at its sole expense those benefits to which its employees would otherwise be entitled to by law. The Grantee remains responsible for all applicable federal, state, and local taxes, and all FICA contributions.

(c) The Grantee specifically accepts responsibility for payment of all taxes, assessments, or contributions that may be required to be paid to any unit of government as a result of the payments being paid to or by the Grantee, if any, in conjunction with this Agreement.

(d) The Grantee is not an agent of Florida Housing. At no time shall the Grantee be authorized to contract or incur any obligations, monetary or otherwise, in the name of Florida Housing. All contracts and agreements entered into with vendors or third-party service providers in connection with the Multi-Year Study shall be in the name of the Grantee, and all cost, expenses and charges in connection therewith shall be the responsibility of the Grantee.

16. COSTS, EXPENSES AND FEES. The only funding provided by Florida Housing under this Agreement shall be the Grant Funds, and such funds shall be provided only in the form of reimbursement(s) to the Grantee for eligible costs incurred by and paid for by the Grantee. Florida Housing assumes no responsibility or liability, and shall have no responsibility or liability to any third party for the payment of any costs, expenses or fees in connection with the Multi-Year Study or this Agreement. At no time shall the Grantee make any commitments for or incur any charges or expenses for, or in the name of, Florida Housing. The Grantee shall be responsible for payment of all costs, expenses and fees in conducting and carrying out the Multi-Year Study and for any other matters contemplated by or in connection with this Agreement.

17. NOTICES. All notices to be made or permitted to be made hereunder shall be in writing and shall be delivered to the addresses shown below or to such other addresses that the parties may provide to one another in accordance herewith. Such notices and other communications shall be given by any of the following means: (a) personal service; (b) national express air courier, provided such courier maintains written verification of actual delivery; or (c) registered US mail. Any notice or other communication given by the means described above shall be deemed effective upon the date of receipt or the date of refusal to accept delivery by the party to whom such notice or other communication has been sent.

Any party may change said address by giving the other parties hereto prior notice of such change of address in accordance with the foregoing provisions.

18. EFFECT OF NON-COMPLIANCE UNDER THIS AGREEMENT. Neither the Grantee nor its principals shall be eligible to participate in or apply for financing, tax credits or grant funding under any Florida Housing program, competitive solicitation or other funding process at any time while the Grantee is not in compliance with the terms and conditions of this Agreement.

19. GENERAL TERMS AND CONDITIONS.

(a) This Agreement and all the terms and provisions hereof shall be construed to effectuate the purposes set forth herein and to sustain the validity hereof.

(b) The titles and headings of the sections of this Agreement have been inserted for convenience of reference only and are not to be considered a part hereof and shall not modify or restrict any of the terms or provisions hereof and shall never be considered or given any effect in construing this Agreement or any provision hereof or in ascertaining intent, if any questions of intent shall arise.

(c) If any provision of this Agreement shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining portions shall not in any way be affected or impaired.

(d) This Agreement may be simultaneously executed in multiple counterparts, all of which shall constitute one and the same instrument and each of which shall be deemed to be an original.

(e) This Agreement shall be construed, and the obligations, rights and remedies of the parties hereunder shall be determined, in accordance with the laws of the State of Florida without regard to conflicts of laws or principles, except to the extent that the laws of the United States of America may prevail.
given any effect in construing this Agreement or any provision hereof or in ascertaining intent, if any questions of intent shall arise.

(c) If any provision of this Agreement shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining portions shall not in any way be affected or impaired.

(d) This Agreement may be simultaneously executed in multiple counterparts, all of which shall constitute one and the same instrument and each of which shall be deemed to be an original.

(e) This Agreement shall be construed, and the obligations, rights and remedies of the parties hereunder shall be determined, in accordance with the laws of the State of Florida without regard to conflicts of laws or principles, except to the extent that the laws of the United States of America may prevail.

(f) Venue for any action under this Agreement shall lie in Leon County, Florida.

Pinellas Hope V (PHV) Methodology

RFP 2014-102
Financing Permanent Supportive Housing for
High Need/High Cost Chronically Homeless Persons

Catholic Charities, Diocese St. Petersburg, Inc. is pleased to resubmit this methodology section of the above awarded contract per requirements for closing the loan for the 45-unit permanent supportive housing project called Pinellas Hope V (PHV). Feedback from the Florida Housing Finance Corporation and state agency partners has led to several adjusted, streamlined, and improved processes, as well as a new research collaboration which will be discussed below. In addition, this methodology follows closely other approved cost/benefit projects conducted nationally and within the State of Florida.

I. Objective

The objective of the study will be to determine the cost/benefit of permanent supportive housing for high need/high cost chronically homeless persons residing in Pinellas Hope V, a 45-unit permanent supportive housing facility located at the Pinellas Hope Campus in Pinellas County, FL.

II. Questions

The questions this research will be studying are:

1. For the study population, what are the annual costs in public expenditures connected with their use of public systems such as jails, emergency rooms, crisis units, shelters, nursing homes/Assisted Living Facilities, long term care facilities, and other institutions?
2. For the study population, what are the cost benefits by providing this housing option, and is this more cost effective than providing little, if any coordinated housing or service intervention?
3. For the study population, what are the socio-economic and behavioral outcomes for all residents of this housing option over the course of the occupancy (i.e. are resident outcomes improved)?

III. Proposed Methodology-Study Design

This is a pre-post, repeated measures study design capturing baseline data of cost/benefit and socio-economic-behavioral outcomes for those individuals entering into Pinellas Hope V and comparing these data variables at set time points throughout the study period. Aggregate data from various data sources (discussed below) will be used to answer the above questions regarding the overall cost/benefit of the project.
To provide information for how demographic and cost data will be collected, the methodology for identifying participants and data sources will be discussed below. Standard demographic information, available on intake forms, will be collected to include, but not limited to: race/ethnicity, national origin, age, gender, sexual orientation, education level, marital status, number of children, veteran status, housing history, work history, income and benefits, social supports, and health data including primary health care status, addiction history, and mental health status.

a. Participant Selection

This project is for Pinellas Hope V, a permanent supportive housing development of 45 units for high need/high cost chronically homeless persons. Priority for admission to Pinellas Hope V will be given to highly vulnerable and high system usage homeless adults/residents seeking housing. Priority status will be determined using the Pinellas County Coordinated Entry List, which includes completion of Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT), essential service provider input such as homeless outreach team members, and Pinellas Hope staff. All potential residents have the right to refuse housing at PHV. Efforts to reengage those who decline will continue.

In summary, priority of resident placement is determined through:

1. Placement on the Pinellas County Coordinated Entry System
2. Service provider input
3. Pinellas Hope staff recommendation.

Once individuals are identified, it is expected that they will remain in this housing situation for the duration of the study period. If a resident is unable to stay within the unit, another high need/high cost homeless individual will take up residence in the unit per the process described above. Residents who remain housed at Pinellas Hope V will be followed for the duration of the study. However, it is expected that there will be residents who do not want to continue to live in the community. Unsuccessful departures include those who are arrested, fail to meet residency requirements and are subject to eviction, and those who leave, disappear and/or become homeless again.

b. Data Sources

Data collection will begin once all residents are in place, or with those in residence in November 2017, and continue until the end of the study period approximately 30 months. It is expected that client level data will be collected at baseline, 6, 12, 24, 30 months until the close of the study. Data on residents will be collected using the internal case management tools, and other electronic health records, and cross referenced with other administrative files. Appropriate statistical analysis to address the research questions will be employed such as dependent t-tests and the equivalent logistic or Poisson procedure for dichotomous or count metrics respectively.

Depending on if residents are willing to participate in the following, individual meetings or very small groupings (2-3 residents) with residents will be scheduled to get resident feedback on their living situation and issues that may not be captured by the standardized tools or case management meetings. This qualitative data will help to alert Catholic Charities to strengths, challenges, or unintended consequences of living in the housing unit. Dr. Fogel will participate
and, if other study members participate, supervise this data effort and provide overviews and themes of emerging issues.

Cost data will be collected following a process similar to what will be followed by another project funded by this RFP. The methodology to use for this project was suggested by the University of South Florida’s (USF) Policy and Services Research Data Center (PSRDC), in the Department of Mental Health Law and Policy at the Louis de la Parte Florida Mental Health Institute (FMHII) which will now join with this project to provide the cost/benefit data and analysis and also provide the master index of high needs/high cost individuals.

Cost data collection: Policy and Services Research Data Center (PSRDC) has previously established agreements with the below sources to attain data for other similar studies. However, for this study, agreements will need to be expanded and/or executed anew in order to apply to this initiative. This includes the Pinellas County Data Collaborative. Because USF has previously executed data sharing agreements with these entities, the process and contact persons are already established.

- Florida Department of Children and Families (DCF/IDS) – SAMHIS mental health and substance abuse service events
- Florida Department of Children and Families – State mental hospital stays
- Florida Agency for Health Care Administration (AHCA) – Medicaid claims
- Florida Baker Act Initiations (BA) – 72 hour involuntary psychiatric evaluations
- Florida Department of Corrections (DOC) – State prison, probation
- Department of Law Enforcement (FDLE) – Statewide arrests
- Pinellas County Criminal Justice Information System (CJIS) – County arrests
- Florida Department of Health (DOH) – Deaths with causes
- Pinellas County Emergency Medical Services (EMS)

Costs prior to living in Pinellas Hope V: Following the process from the other funded projects, Policy and Services Research Data Center (PSRDC) will establish the annual cost of public services for those living in Pinellas Hope V by adding up the cost of each recognized contact with any public system. Rubrics that specify the costs associated with each interaction type will be developed based on the data sources. A flat rate per interaction by type of service contact will be developed based on rates provided by that service institution (i.e. jails), or actual known costs (Medicaid), or known average costs. These costs will then be matched and added up for each individual on the master index.

Cost to public systems after placement in Pinellas Hope V: Following the process from the other funded project, PSRDC will utilize the same administrative data utilized to establish pre-placement costs and match post housing service interactions by residents in Pinellas Hope V. In addition, case files will be reviewed and matched with available system level data. It is expected that Pinellas Hope V case managers will know of many, if not all, of the situations when a resident may encumber a public service cost.

Additional costs: It is expected that initial costs related to the relocation and integration of the residents will increase as public services and organizational costs (Catholic Charities) are utilized to initially intervene with the residents in order to promote stability and long term positive outcomes. Catholic Charities will provide available internal costs, if applicable, and other new service costs will be determined based on the rubrics described above.
It is important to emphasize the difference between costs associated with housing residents (i.e., "Housing First") and those costs associated with providing a comprehensive array of services for highly vulnerable and high need clients/residents. Housing costs rely on a landlord/tenant relationship. Service costs for high vulnerability clients include behavioral health services and treatment, substance abuse services and treatment, medication management, case management, life and employability skills training, GED, education and certification training and other services. Most of these services are provided by outside organizations that co-locate staff at PHV to assist with serving this population. In addition, most of these organizations are significantly underfunded and this create challenges for addressing the acute needs of this highly vulnerable population. Co-located services provided by other organizations will be documented and estimates of service costs to this population will attempt to be made.

**Entities performing demographic and cost data collection:** This study will utilize the services of the Policy and Services Research Data Center (PSRDC) to access the system-level administrative data needed for cost data collection as well as to create the master index of high need/high cost homeless individuals. In addition, client level data will be collected by Pinellas Hope V case managers or other staff assigned to this housing unit. Oversight of the cost and client data collection will be assumed by Dr. Sondra J. Fogel, Principal Investigator, USF, School of Social Work and co-investigator Charles Dion, MA, PSRDC.

**IV. Analysis Methods**

As stated above, PSRDC has the experience and capacity to capture and analyze the administrative cost data required for this study. In addition, Catholic Charities has an internal system for reporting client information at both the individual and aggregate level (see below in Resident Outcomes). The study investigators will oversee the export of aggregated data from both sources to ensure compliance with study procedures noted above and will provide regular reports on study progress to Catholic Charities.

**Resident Outcomes.** Resident outcomes will be collected at the pre-set times of baseline, 6, 12, 24, and 30 months. The internal assessment forms used by Catholic Charities, case manager input, as well as the required VI-SPDAT will be used to determine resident socio-economic-behavioral outcomes over time. Examples of resident socio-economic-behavioral outcomes include:

- Increased income (through access to benefits or employment)
- Case plan compliance and goal success
- Maintaining sobriety
- Improved health and mental health outcomes on identified indicators

Residents will meet with a PHV case manager, to address goals mutually agreed upon in an individual service plan. Examples of goal domains include: mental health, substance abuse, medical, housing, education, employability, social skills and income.

Prior to the beginning of the data collection, all forms will be reviewed to ensure that appropriate data is being collected and a process for sharing information with the resident on his/her outcomes is in place. If additional information or a development of an additional form is needed,
reliable and validated measures will be looked at such as SAMSHA’s Government and Performance Results (GPRA) National Outcome Measurement tool to develop an appropriate instrument.

V. Researchers: Co-PIs

Dr. Sondra J. Fogel, at the University of South Florida will be the lead PI. Dr. Fogel has extensive research and history working with this population, resulting in numerous publications, presentations, and funding. Dr. Fogel has a master’s degree from Columbia University and her Ph.D. in Social Work from the University of Illinois at Urbana-Champaign. She is a licensed clinical social worker as well. Dr. Fogel was the lead author of the initial Pinellas Hope evaluation and the later follow up study. In addition, she is familiar with the community and service agencies that work with Pinellas Hope. Dr. Fogel is a past recipient of the HUD COPC grant and has recently completed research investigating how Pinellas and Hillsborough counties are prepared to help those who are homeless during disasters. This work is in conjunction with the National Health Care for the Homeless Council.

The PSRDC’s Director, Charles Dion, MA, is a co-investigator on this project. He will oversee the actions of the PSRDC in this project. The PSRDC has access to statewide Medicaid claims data, mental health claims data on services paid for by the state and general revenue funds, adult corrections data, and all petitions for involuntary examination under Florida’s civil commitment law (nearly 600,000 petitions generated over the last six years). The PSRDC has become an expert in all of the complex activities (data cleaning, assuring reliability, etc.) that are essential to working with large archival data sets. Of particular relevance is PSRDC’s experience as the host entity and analyst for data generated through the Pinellas County Data Collaborative, an initiative established in 1999 to enhance county mental health services by encouraging collaboration among community service providers, government agencies, and educational institutions.

VI. Funding

Catholic Charities will seek funds from private foundations, donors and fundraisers that have a deep interest in homelessness. Prior to the new partnerships with PSRDC, the expected amount needed to be raised to support this project was in the range of $80,000 to $125,000 to be spread over the three years of the study. It is expected that this range may increase due to the addition of PSRDC work. However, these costs will be spread over numerous years giving Catholic Charities time to collect these funds privately. Any remaining costs not collected privately will be paid for directly by Catholic Charities general account and/or using their developer fees collected from this project.

VII. Challenges

Construction challenges and delays in permits related to occupancy of PHV presented many unanticipated circumstances which significantly impacted the start of this study and data collection. The ability to fill PHV with those in need of housing spanned almost a year. The following items are expected challenges to completing this study:
• The ability to track, locate and follow residents who have left, especially those that leave unsuccessfully (jail, eviction, etc.) to include their follow-up data in the study. The chronic homeless population has a history of difficulty in maintaining contact with case managers following program exit.
• At times, units may not be occupied due to needed repairs.
• Funding continuation of intensive wrap around services (behavioral/mental health services, substance abuse treatment/services, intensive case management, employability skills training, job development and other intensive and necessary services) once the individuals are placed into this housing.
• Access to timely data from each of the data systems. All of the data systems have varying lag times for when the data are available.

VIII. Timeline

Pinellas Hope V (PHV) is a 45 permeant supportive housing residence. As of December 14, 2017, 43 units are occupied. The first resident moved in on December 27, 2016. However, due to unanticipated delays, PHV occupancy was slower than expected during the first 4 months of this study. However, occupancy rates began to rise with the bulk of residents in units by late Fall 2017. The latest resident to enter PHV occurred on October 18, 2017. Given the span of the occupancy rates, the following timeline is projected for the completion of this RFP. However, please note that 2 more residents may move in before the end of the year. Socio-behavioral data collection starts when the resident assumes occupancy (baseline) and follows the timeline in the methodology.

Baseline public data: Public cost data will be collected for each resident for the time period of 363 days prior to move in date and aggregated.

Ex. Move in date 12/27/2016- baseline data: Costs of services available through the Policy and Service Research Data Center (PSRDC) will be collected for the time period from 12/27/2015-12/26/2016 and aggregated.

Participants: All residents to date are included in the study.

Projected completion: As stated in the methodology, the last data collection period of the resident is at the 30 month mark of his/her tenure in housing. Socio-behavioral data collection will end at the 30th month for each resident. This will vary by the initial month of occupancy of each resident. The PSRDC typically receives data from the various sources at set time points, typically 6-months to 1 year following a time period. Using a late occupancy as an example which occurred on 10/18/17, a projected timeline for this study is as follows:

Aggregate baseline date: 10/18/2016-10/17/2017

Move in date: 10/18/2017

Aggregate 6 month data: April 2018
Aggregate 12 month data: October 2018
Aggregate 24 month data: October 2019
Aggregate 30 month data: April 2020

Accounting for another 3 months for PSRDC to receive necessary data to generate aggregate 30 month data, we are projecting that this will be July 2020. It is expected that data analysis will take 2 months after the final receipt which is expected by September 2020. The final report will be completed no later than 10/31/2020.

IX: Deliverables:

A final report will be delivered no later than 10/31/20 to Catholic Charities which will address in detail the findings to the 3 research questions. In addition, the study investigators will collaborate to present reports of findings from this project to key stakeholders and other professionals.

REQUEST FOR MODIFICATION/AMENDMENT

Modification No.: 2

Contractor Name: The University of South Florida Board of Trustees

TYPE OF MODIFICATION/AMENDMENT

___ Extension of performance period  
___ Revised scope of work  
___ Additional funding  
___ Reduction in funding  
___ Change in budget categories  
___ Other: deadline for final report updated

DESCRIPTION OF ACTION(S) TAKEN

The last paragraph on the updated scope of work in section VIII. Timeline is deleted and replaced with the following:

Accounting for another 3 months for PSRDC to receive necessary data to generate aggregate 30-month data, we are projecting that this will be July 2020. It is expected that data analysis will take 2 months after the final receipt, which is expected by September 2020. The Final report will be completed no later than 10/31/2020.

IX. Deliverables on the updated scope of work on modification #1 is deleted in its entirety and replaced with the following:

A final report will be delivered no later than 10/31/2020 to Catholic Charities, which will address in detail, the findings to the 3 research questions. In addition, the study investigators will collaborate to present reports of findings from this project to key stakeholders and other professionals.

All other terms and conditions remain unchanged.

ACCEPTANCE AND AGREEMENT

The above-referenced modification(s)/amendment(s), is hereby incorporated into the subject subagreement.

Scope of Work for Pinellas Hope V RFP 2014-102
(Revised 2.22.18)

Financing Permanent Supportive Housing for
High Need/High Cost Chronically Homeless Persons

As outlined in the funded RFP, Dr. Sondra Fogel and Charles Dion will be involved in various activities to determine the cost/benefit of permanent supportive housing for high need/high cost chronically homeless persons residing in Pinellas Hope V, a 45 unit permanent supportive housing facility located in the St. Petersburg, FL community. Activities include:

- Two and one-half years of data collection.
- Analysis of cost data at set time points to include in final report.
- Analysis of aggregate social-behavioral outcomes to include in final report.
- Recurrent meetings between co-PI’s to discuss research project.
- Periodic review of the scholarly literature to ensure capturing current trends in this area.
- Periodic site visits to ensure data collection fidelity.
- Participation in various project meeting with Pinellas Hope staff and others related to the work.
- Collaboration in presenting reports of findings from this project to key stakeholders and other professionals
- Preparation and delivery of final report at the end of study period.

I. Methodology—Study Design

This is a pre-post, repeated measures study design capturing baseline data of cost/benefit and socio-economic-behavioral outcomes for those individuals entering into Pinellas Hope V and comparing data variables (discussed below) at set time points throughout the study period. Aggregate data from various data sources will be used to answer the following questions:

1. For the study population, what are the annual costs in public expenditures connected with their use of public systems such as jails, emergency rooms, crisis units, shelters, nursing homes/Assisted Living Facilities, long term care facilities, and other institutions?
2. For the study population, what are the cost/benefits by providing this housing option, and is this more cost effective than providing little, if any coordinated housing or service intervention?
3. For the study population, what are the socio-economic and behavioral outcomes for all residents of this housing option over the course of the occupancy (i.e. are resident outcomes improved)?

To provide information for how demographic and cost data will be collected, the methodology for identifying participants and data sources will be discussed below. Standard demographic information, available on intake forms, will be collected to include, but not limited to: race/ethnicity, national origin, age, gender, sexual orientation, education level, marital status, number of children, veteran status, housing history, work history, income and benefits, social
supports, and health data including primary health care status, addiction history, and mental health status.

a. Participant Selection

This project is for Pinellas Hope V, a permanent supportive housing development of 45 units for high need/high cost chronically homeless persons. Priority for admission to Pinellas Hope V will be given to highly vulnerable and high system usage homeless adults/residents seeking housing. Priority status will be determined using the Pinellas County Coordinated Entry List, which includes completion of Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT), essential service provider input such as from homeless outreach team members, and Pinellas Hope staff. All potential residents have the right to refuse housing at PHV. Efforts to reengage those who decline will continue.

In summary, priority of resident placement is determined through:

1. Placement on the Pinellas County Coordinated Entry System
2. Service provider input
3. Pinellas Hope staff recommendation.

Once individuals are identified, it is expected that they will remain in this housing situation for the duration of the study period. If a resident is unable to stay within the unit, another high need/high cost homeless individual will take up residence in the unit per the process described above. Residents who remain housed at Pinellas Hope V will be followed for the duration of the study. However, it is expected that there will be residents who do not want to continue to live in the community. Unsuccessful departures include those who are arrested, fail to meet residency requirements and are subject to eviction, and those who leave, disappear and/or become homeless again.

b. Data Sources

Data collection will begin once all residents are in place, or with those in residence in November 2017, and continue until the end of the study period approximately 30 months. It is expected that client level data will be collected at baseline, 6, 12, 24, 30 months until the close of the study. Data on residents will be collected using the internal case management tools, and other electronic health records, and cross referenced with other administrative files. Appropriate statistical analysis to address the research questions will be employed such as dependent t-tests and the equivalent logistic or Poisson procedure for dichotomous or count metrics respectively.

Depending on if residents are willing to participate in the following, individual meetings or very small groupings (2-3 at a time) with residents will be scheduled to get resident feedback on their living situation and issues that may not be captured by the standardized tools or case management meetings. This qualitative data will help to alert Catholic Charities to strengths, challenges, or unintended consequences of living in the housing unit. Dr. Fogel will participate and, if other study members participate, supervise this data effort and provide overviews and themes of emerging issues.

Cost data will be collected following a process similar to what will be followed by another project funded by this RFP. The methodology to use for this project was suggested by the University of South Florida’s (USF) Policy and Services Research Data Center (PSRDC), in
the Department of Mental Health Law and Policy at the Louis de la Parte Florida Mental Health Institute (FMHI) which will now join with this project to provide the cost/benefit data and analysis and also provide the master index of high needs/high cost individuals.

Cost data collection: Policy and Services Research Data Center (PSRDC) has previously established agreements with the below sources to attain data for other similar studies. However, for this study, agreements will need to be expanded and/or executed anew in order to apply to this initiative. This includes the Pinellas County Data Collaborative. Because USF has previously executed data sharing agreements with these entities, the process and contact persons are already established.

- Florida Department of Children and Families (DCF/IDS) – SAMHIS mental health and substance abuse service events
- Florida Department of Children and Families – State mental hospital stays
- Florida Agency for Health Care Administration (AHCA) – Medicaid claims
- Florida Baker Act Initiations (BA) – 72 hour involuntary psychiatric evaluations
- Florida Department of Corrections (DOC) – State prison, probation
- Department of Law Enforcement (FDLE) – Statewide arrests
- Pinellas County Criminal Justice Information System (CJIS) – County arrests
- Florida Department of Health (DOH) – Deaths with causes
- Pinellas County Emergency Medical Services (EMS)

Costs prior to living in Pinellas Hope V: Following the process from the other funded projects, Policy and Services Research Data Center (PSRDC) will establish the annual cost of public services for those living in Pinellas Hope V by adding up the cost of each recognized contact with any public system. Rubrics that specify the costs associated with each interaction type will be developed based on the data sources. A flat rate per interaction by type of service contact will be developed based on rates provided by that service institution (i.e. jails), or actual known costs (Medicaid), or known average costs. These costs will then be matched and added up for each individual on the master index.

Cost to public systems after placement in Pinellas Hope V: Following the process from the other funded project, PSRDC will utilize the same administrative data utilized to establish pre-placement costs and match post housing service interactions by residents in Pinellas Hope V. In addition, case files will be reviewed and matched with available system level data. It is expected that Pinellas Hope V case managers will know of many, if not all, of the situations when a resident may encumber a public service cost.

Additional costs: It is expected that initial costs related to the relocation and integration of the residents will increase as public services and organizational costs (Catholic Charities) are utilized to initially intervene with the residents in order to promote stability and long term positive outcomes. Catholic Charities will provide available internal costs, if applicable, and other new service costs will be determined based on the rubrics described above.

It is important to emphasize the difference between costs associated with housing residents (i.e. "Housing First") and those costs associated with providing a comprehensive array of services for highly vulnerable and high need clients/residents. Housing costs rely on a landlord/tenant relationship. Service costs for high vulnerability clients include behavioral health services and treatment, substance abuse services and treatment, medication management, case
management, life and employability skills training, GED, education and certification training and other services. Most of these services are provided by outside organizations that co-locate staff at PHV to assist with serving this populations. In addition, most of these organizations are significantly underfunded and this create challenges for addressing the acute needs of this highly vulnerable population. Co-located services provided by other organizations will be documented and estimates of service costs to this population will attempt to be made.

Entities performing demographic and cost data collection: This study will utilize the services of the Policy and Services Research Data Center (PSRDC) to access the system-level administrative data needed for cost data collection as well as to create the master index of high need/high cost homeless individuals. In addition, client level data will be collected by Pinellas Hope V case managers or other staff assigned to this housing unit. Oversight of the cost and client data collection will be assumed by Dr. Sondra J. Fogel, Principal Investigator, USF, School of Social Work and co-Investigator, Charles Dion, MA, PSRDC.

II. Analysis Methods

As stated above, PSRDC has the experience and capacity to capture and analyze the administrative cost data required for this study. In addition, Catholic Charities has an internal system for reporting client information at both the individual and aggregate level (see below in Resident Outcomes). The study investigators will oversee the export of aggregated data from both sources to ensure compliance with study procedures noted above and Dr. Fogel will provide regular reports on study progress to Catholic Charities.

Resident Outcomes. Resident outcomes will be collected at the pre-set times of baseline, 6, 12, 24, and 30 months. The internal assessment forms used by Catholic Charities, case manager input, as well as the required VI-SPDAT will be used to determine resident socio-economic-behavioral outcomes over time. Examples of resident socio-economic-behavioral outcomes include:

- Increased income (through access to benefits or employment)
- Case plan compliance and goal success
- Maintaining sobriety
- Improved health and mental health outcomes on identified indicators

Residents will meet with a PHV case manager, to address goals mutually agreed upon in an individual service plan. Examples of goal domains include: mental health, substance abuse, medical, housing, education, employability, social skills and income.

Prior to the beginning of the data collection, all forms will be reviewed to ensure that appropriate data is being collected and a process for sharing information with the resident on his/her outcomes is in place. If additional information or a development of an additional form is needed, reliable and validated measures will be looked at such as SAMSHA’s Government and Performance Results (GPRA) National Outcome Measurement tool to develop an appropriate instrument.
III. Researchers: Co-PIs

Dr. Sondra J. Fogel, at the University of South Florida will be the lead PI. Dr. Fogel has extensive research and history working with this population, resulting in numerous publications, presentations, and funding. Dr. Fogel has a master’s degree from Columbia University and her Ph.D. in Social Work from the University of Illinois at Urbana-Champaign. She is a licensed clinical social worker as well. Dr. Fogel was the lead author of the initial Pinellas Hope evaluation and the later follow up study. In addition, she is familiar with the community and service agencies that work with Pinellas Hope. Dr. Fogel is a past recipient of the HUD COPC grant and has recently completed research investigating how Pinellas and Hillsborough counties are prepared to help those who are homeless during disasters. This work is in conjunction with the National Health Care for the Homeless Council.

The PSRDC’s Director, Charles Dion, MA, is a co-investigator on this project. He will oversee the actions of the PSRDC in this project. The PSRDC has access to statewide Medicaid claims data, mental health claims data on services paid for by the state and general revenue funds, adult corrections data, and all petitions for involuntary examination under Florida's civil commitment law (nearly 600,000 petitions generated over the last six years). The PSRDC has become an expert in all of the complex activities (data cleaning, assuring reliability, etc.) that are essential to working with large archival data sets. Of particular relevance is PSRDC’s experience as the host entity and analyst for data generated through the Pinellas County Data Collaborative, an initiative established in 1999 to enhance county mental health services by encouraging collaboration among community service providers, government agencies, and educational institutions.

VI. Funding

Catholic Charities will seek funds from private foundations, donors and fundraisers that have a deep interest in homelessness. Prior to the new partnerships with PSRDC, the expected amount needed to be raised to support this project was in the range of $80,000 to $125,000 to be spread over the three years of the study. It is expected that this range may increase due to the addition of PSRDC work. However, these costs will be spread over numerous years giving Catholic Charities time to collect these funds privately. Any remaining costs not collected privately will be paid for directly by Catholic Charities general account and/or using their developer fees collected from this project.

VII. Challenges

Construction challenges and delays in permits related to occupancy of PHV presented many unanticipated circumstances which significantly impacted the start of this study and data collection. The ability to fill PHV with those in need of housing spanned almost a year.

The following items are expected challenges to completing this study:

- The ability to track, locate and follow residents who have left, especially those that leave unsuccessfully (jail, eviction, etc.) to include their follow-up data in the study. The
chronic homeless population has a history of difficulty in maintaining contact with case managers following program exit.

- At times, units may not be occupied due to needed repairs.
- Funding continuation of intensive wrap around services (behavioral/mental health services, substance abuse treatment/services, intensive case management, employability skills training, job development and other intensive and necessary services) once the individuals are placed into this housing.
- Access to timely data from each of the data systems. All of the data systems have varying lag times for when the data are available.

VIII. Timeline

Pinellas Hope V (PHV) is a 45 permeant supportive housing residence. As of December 14, 2017, 43 units are occupied. The first resident moved in on December 27, 2016. However, due to unanticipated delays, PHV occupancy was slower than expected during the first 4 months of this study. However, occupancy rates began to rise with the bulk of residents in units by late Fall 2017. The latest resident to enter PHV occurred on October 18, 2017. Given the span of the occupancy rates, the following timeline is projected for the completion of this RFP. However, please note that 2 more residents may move in before the end of the year. Socio-behavioral data collection starts when the resident assumes occupancy (baseline) and follows the timeline in the methodology.

Baseline public data: Public cost data will be collected for each resident for the time period of 363 days prior to move in date and aggregated.

Ex. Move in date 12/27/2016- baseline data: Costs of services available through the Policy and Service Research Data Center (PSRDC) will be collected for the time period from 12/27/2015-12/26/2016 and aggregated.

Participants: All residents to date are included in the study.

Projected completion: As stated in the methodology, the last data collection period of the resident is at the 30 month mark of his/her tenure in housing. Socio-behavioral data collection will end at the 30th month for each resident. This will vary by the initial month of occupancy of each resident. The PSRDC typically receives data from the various sources at set time points, typically 6-months to 1 year following a time period. Using a late occupancy as an example which occurred on 10/18/17, a projected timeline for this study is as follows:

Aggregate baseline date: 10/18/2016-10/17/2017
Move in date: 10/18/2017
Aggregate 6 month data: April 2018
Aggregate 12 month data: October 2018
Aggregate 24 month data  October 2019
Aggregate 30 month data  April 2020

Accounting for another 3 months for PSRDC to receive necessary data to generate aggregate 30 month data, we are projecting that this will be July 2020. It is expected that data analysis will take 2 months after the final receipt which is expected by September 2020. The final report may take 2-3 months to compile, with a projected completion data no later than 12/30/2020.

IX: Deliverables

A final report will be delivered no later than 12/30/2020 to Catholic Charities which will address in detail, the findings to the 3 research questions. In addition, the study investigators will collaborate to present reports of findings from this project to key stakeholders and other professionals.
Charles J Dion, M.A.

EDUCATION

UNIVERSITY OF SOUTH FLORIDA - TAMPA, FL (1995)
Master of Arts, Mathematics with a concentration in Statistics
Thesis - A Logistic Model to Predict Radon Danger in Florida Homes

UNIVERSITY OF SOUTH FLORIDA - TAMPA, FL (1986)
Bachelor of Arts, Mathematics

SUMMARY OF QUALIFICATIONS AND EXPERIENCE

- 20 years of experience leading highly skilled and effective analysis teams
- More than 20 years of SAS programming and data management experience
- More than 20 years of statistical data analysis experience using a wide range of approaches and methods
- More than 20 years of Medicare, Medicaid, and private health claims data analysis
- Seven years of analysis of other administrative data including child welfare, involuntary commitments, education, and criminal justice data (arrests, jail/prison stays, and probations)
- Other statistical software experience include Stata, SPSS, MPLUS, and R
- Data mining experience using Clementine and SAS Enterprise Miner

AWARDS AND ACHIEVEMENTS

- Who’s Who in the World; Who’s Who in America; Who’s Who in Science and Engineering
- Over 30 publications and presentations
- Pi Mu Epsilon (Mathematics Honor Society)
- Certified Six Sigma Master Black Belt
- Served as Chairman of the Data Network Committee for the College of Behavioral and Community Sciences at USF 2009-Present
- Served on a Centers for Medicare and Medicaid Services (CMS) Leadership Advisory Panel for the Healthcare Quality Improvement Program (HCQIP)
- Successfully managed the analytic component of the Florida Medicare Quality Improvement Organization (QIO) contract within budget and with minimum turnover of analytic staff
- Formally recognized by FMQAI CEO as being instrumental in FMQAI’s earning of an award fee and non-competitive renewal for the QIO contract, 2002
- Recognized by Employer’s Health Coalition with their Founder’s Award for work on the Healthy People/ Productive Communities Survey, 2003
- Developed a comprehensive quality measurement system including dashboard reports and Balanced Scorecard to keep senior management and Board members of FMQAI abreast of progress toward company goals. Work in this area contributed to the organization receiving the 2004 “Sense Making” Award from the Centers for Medicare and Medicaid Services (CMS)
- Successfully served as principal statistician on over 50 physical and mental health services research, evaluation, and quality improvement projects over the last 19 years
- Developed neural network and classification tree models used to detect payment errors. The models were used to target interventions reducing the Florida Medicare inpatient payment errors by approximately $10M from 1999 to 2000. (Unpublished Analysis)
- Served on planning committee for three successful CMS sponsored annual technical meetings
- Served on CMS advisory committee on outpatient data
- Served as statistical editorial advisor for two years on a national publication for quality improvement in treatment of acute myocardial infarction
- Served as principal investigator or co-principal investigator for nine research and evaluation studies with over $1M in funding

PROFESSIONAL EXPERIENCE

UNIVERSITY OF SOUTH FLORIDA - TAMPA, FL (2009-PRESENT)
Director, Policy and Services Research Data Center

120 E. trapnell Rd,
Plant City, Florida 33566
www.linkedin.com/in/charlesdion
(813) 365-2501
cjdion@msn.com
Charles J Dion, M.A.
Louis de la Parte Florida Mental Health Institute
College of Behavioral and Community Sciences

HUNTINGTON LEARNING CENTER - VALRICO, FL (2007-PRESENT)
Franchise Owner

FLORIDA MEDICAL QUALITY ASSURANCE, INC. - TAMPA, FL (1994-2008)
Positions Held: Chief Analytical Officer (CAO), Director of Analytic Services, Lead Statistician, Statistician, Data Analyst

UNIVERSITY OF SOUTH FLORIDA - TAMPA, FL (1994)
Graduate Teaching Assistant

PRINCIPAL INVESTIGATOR (Total Funding $1,166,636)

UNIVERSITY OF SOUTH FLORIDA - TAMPA, FL
Pinellas Hope IV Supportive Housing Evaluation (2017-2018; Co-PI: $49,176)
Coalition Lift Supportive Housing Evaluation (2016-2020; $160,903)
Connecting People and Place: Improving Communities through Integrated Data Systems (2014; $50,000)
Firearm laws, mental disorder, and violence. (2013-2014; $24,791)
Pinellas Drug Court Evaluation (2012; $50,000)
Pinellas Data Collaborative (2009-2017; $165,000)
Evaluation of AHCA Mental Health Services Infrastructure (2009-2017; $614,447)
Marion County Mental Health Court Evaluation (2011-2013 Co-PI; $13,794)
Profile of Pinellas County Adult Drug Court Clients (2011; $50,000)

CONSULTING EXPERIENCE

EMPLOYER'S HEALTH COALITION - TAMPA, FL (1999-2007)
Healthy People/ Productive Communities - Management and analysis of productivity and health status data collected from a survey of employees from local companies. Principal accomplishment of the study was the development of a scale measuring productivity impairment due to health issues.

TENSA MEDICAL FOUNDATION (2005)
Developed neural network and classification trees to detect payment errors from Medicare Part A claims data and national payment error file.

END STAGE RENAL DISEASE NETWORK OF FLORIDA - TAMPA, FL (2003)
Hemodialysis Adequacy - Quality improvement project studying and improving the adequacy of Hemodialysis in Florida dialysis centers and measuring the effects of various improvement interventions. Hemodialysis adequacy improved by 34% in the main intervention group.

Vascular Access - Quality improvement project studying and decreasing the use of catheters for vascular access in hemodialysis. Inappropriate catheter utilization was reduced by 28%.

HARRIS ALLEN ASSOCIATES, INC. - BOSTON, MA (1999-2002)
Analysis of productivity, absenteeism and health related data from various administrative sources as well as an employee survey.

ENTRUSTED HEALTH PLANS - TAMPA, FL (2001)
Developed and produced various reports of health care claims data using SAS.

AMERICAN BIODYNE - TAMPA, FL (1994)
Performed statistical analysis testing the efficacy of various psychological therapies. Results of the analysis were presented at a conference of the World Health Organization.
Charles J Dion, M.A.

Education:

Ph.D. October 1994 University of Illinois at Urbana-Champaign
School of Social Work
Dissertation: Moving along: An exploratory study of homeless women
with children in a transitional housing setting

MSSW May 1983 Columbia University, New York
School of Social Work
Combined macro and micro social work focus,
Business minor

BA May 1980 State University of New York at Buffalo
Double major: Psychology and Sociology

Academic and Administrative Appointments:

Associate Professor, School of Social Work (Fall, 2000-present)

Provide instruction across the BSW, MSW, and Ph.D. curriculums in the School of Social Work
as well as service-learning oriented courses related to homelessness and poverty. Research
interests include poverty; particularly homeless individuals and vulnerable populations, social
work education, community-building and strength-based interventions with at-risk youth,
families and older adults, and the use of capital punishment. Participate in diverse faculty
governance, department, and professional service activities. Recent courses taught include:

Ph.D.: Evaluation of social work practice/program evaluation
MSW: Foundations of Micro Practice
Foundations of Macro Practice
Advance Social Welfare Policy
Health, Illness, and Disabilities
Capstone

BSW: Foundations of Macro Practice
Director of Special Programs, Honors College (Fall, 2012-2016)

Founding Director. Responsible for the procedures and operations of elite student honor programs including the Provost Scholars, Honors Global Scholars, National Merit, Achievement, and Hispanic Scholars programs and Stetson Law School-USF 3+3 program. Develop and participate in a variety of student success initiatives within the Honors College as well as within the University. Participate in daily activities at the Director level for the Honors College, which includes fiscal oversight for related programs, recruitment activities, program development, IRB College reviewer, and other leadership duties as assigned. Coordinate with diverse offices on campus to develop pathways for student achievement. Serve as a faculty member for honors theses and courses. Initiate and participate with students on various research projects and international study abroad programs. Teaching areas include honors thesis prospectus and final thesis courses for all advanced or graduating Honors College students and independent research projects for other Honors College students.

Faculty Associate, Office of Institutional Effectiveness, Academic Planning and Review (Fall, 2008-2012)

Develop procedures and manage activities for Florida Board of Governors mandated university academic program reviews, new degree development, accreditation visits and institutes and center reporting procedures. Facilitate and assist with University Southern Association of College and Schools (SACS) accreditation efforts. Collaborate with diverse offices on various internal projects related to institutional effectiveness.

Assistant Professor, Department of Sociology, Anthropology, and Social Work, UNC Charlotte (Fall, 1994-Summer, 2000)

Responsible for course instruction and curriculum development in the upper level division of the BSW Social Work Program. Research interests included poverty and field education. Tenured.

Director of Field Education, UNC Charlotte (Fall, 1994-Spring, 1996)

Responsible for the development, implementation, and administration of a generalist field education component in an accredited BSW curriculum. Recruited and evaluated placement sites, developed community linkages, and responded to agency and student issues. Provided upper level undergraduate classroom instruction, training to field instructors, and supervision to field liaisons.

Awarded Grants/Contracts:

Fogel, S. (2002). $8,000. Creating opportunities for civic participation and leadership with West Tampa youth through interactive web-based services. Children’s Board of Hillsborough County. Technical assistance grant for the West Tampa Community Development Corporation.

2002-10: Consulting Editor, Journal of Baccalaureate Social Work

Professional Organization Affiliations:

Academy of Certified Social Workers
American Society of Criminology
Association of Community Organizers and Social Administration (ACOSA)
Council on Social Work Education
National Association of Social Workers
Society for Social Work Research

Select Prior Professional Experience:

Director, Army Community Services (ACS) Wildflecken, West Germany, 1988-1990

Responsible for the administration, program development, staff actions, supervision, fiscal management, and evaluation for ten social service programs. Supervised 10 social service staff members including one MSW. Worked closely with community volunteers. Represented agency at a monthly interdisciplinary professional team meeting to evaluate social service needs of identified soldiers and their families. Determined intervention action plans in coordination with other community services. Delivered individual and group work services to identified child abuse and domestic violence clients and families. Other duties included Community School's Officer and member of Federal Women's Council.

Sub-Community Director, ACS, Butzbach, West Germany, 1987-1988

Oversaw yearly budget projections and the daily operations of eight social services programs. Hired and supervised one MSW, five social service staff members, and volunteers. Designed and implemented management policies, provided community and troop information briefings and
quarterly parent education classes. Delivered case management and group work services to suspected and identified families and individuals experiencing violence, abuse or neglect. Provided case consultation to assist with the development of assessment and treatment plans.

*Family Advocate Program Manager, ACS, Butzbach, West Germany, 1985-1987*

Responsible for community prevention activities, identification and treatment of domestic violence and child neglect and abuse cases for an Army installation. Chaired a multi-disciplinary team of agency providers to coordinate case management services to identified families. Provided on-call, crisis intervention, individual and group work services to high risk and abusive families. Developed, designed, and implemented a model foster care program for the community, including the recruitment, orientation, and training of foster care parents. Provided community and troop briefings, quarterly parenting classes and monthly news articles to the installation newsletter. Established administrative procedures for reporting incidents.
Funding Sources Used

1.) Funding is received from the Pinellas County Human Services Department to support the two Intensive Case Managers for Pinellas Hope V clients.
2.) Other subsidized funding is received from the clients who live there and have benefits (Supplemental Security Income (SSI) / Social Security Disability Insurance (SSDI).
3.) In-Kind services received from Pinellas County Human Services Department through their Cooperative Agreement to Benefit Homeless Individuals for substance abuse and mental health group therapy twice per week, plus individual therapy.
4.) Catholic Charities supports all other funding needed for the operation of the program.

Catholic Charities will seek funds from private foundations, donors and fundraisers that have a deep interest in homelessness. Prior to the new partnerships with PSRDC, the expected amount needed to be raised to support this project was in the range of $80,000 to $125,000 to be spread over the three years of the study. It is expected that this range may increase due to the addition of PSRDC work. However, these costs will be spread over numerous years giving Catholic Charities time to collect these funds privately. Any remaining costs not collected privately will be paid for directly by Catholic Charities general account and/or using their developer fees collected from this project.
Exhibit E: Timeline

Pinellas Hope V (PHV) is a 45 permeant supportive housing residence. As of December 14, 2017, 43 units are occupied. The first resident moved in on December 27, 2016. However, due to unanticipated delays, PHV occupancy was slower than expected during the first 4 months of this study. However, occupancy rates began to rise with the bulk of residents in units by late Fall 2017. The latest resident to enter PHV occurred on October 18, 2017. Given the span of the occupancy rates, the following timeline is projected for the completion of this RFP. However, please note that 2 more residents may move in before the end of the year. Socio-behavioral data collection starts when the resident assumes occupancy (baseline) and follows the timeline in the methodology.

**Baseline public data:** Public cost data will be collected for each resident for the time period of 363 days prior to move in date and aggregated.

**Ex. Move in date 12/27/2016- baseline data:** Costs of services available through the Policy and Service Research Data Center (PSRDC) will be collected for the time period from 12/27/2015-12/26/2016 and aggregated.

**Participants:** All residents to date are included in the study. Given that the last resident moved in on 10/18/17 in the 43rd unit, there are still 2 units to be filled to include in the study.

**Projected completion:** As stated in the methodology, the last data collection period of the resident is at the 30 month mark of his/her tenure in housing. Socio-behavioral data collection will end at the 30th month for each resident. This will vary by the initial month of occupancy of each resident. The PSRDC typically receives data from the various sources at set time points, typically 6-months to 1 year following a time period. Given that the last occupancy occurred on 10/18/17, a projected timeline for this study is as follows:

- **Aggregate baseline date:** 10/18/2016-10/17/2017
- **Move in date:** 10/18/2017
- **Aggregate 6 month data:** April 2018
- **Aggregate 12 month data:** October 2018
- **Aggregate 24 month data:** October 2019
- **Aggregate 30 month data:** April 2020

Accounting for another 3 months for PSRDC to receive necessary data to generate aggregate 30 month data, we are projecting that this will be July 2020. It is expected that data analysis will take 2 months after the final receipt which is expected by September 2020. The final report will be completed by 10/31/2020.
EXHIBIT F

REQUEST FOR REIMBURSEMENT AND CERTIFICATION
To Be Submitted with Each Request for Reimbursement

Request for Reimbursement #: ______

Development Name: ________________________________

The undersigned Grantee hereby submits its request for reimbursement of certain costs and expenses incurred by the Grantee in carrying out the Multi-Year Study pursuant to the GRANT AGREEMENT FOR MATCH FUNDING TO BE USED FOR RESEARCH RELATED TO DEVELOPMENTS FUNDED TO SERVE HIGH NEEDS/HIGH COST POPULATIONS between Florida Housing Finance Corporation (Florida Housing) and the Grantee dated ________________, 2017 (the “Grant Agreement”).

The Grantee understands that Florida Housing will reimburse the Grantee in Grant Funds up to one-third of the costs and expenses incurred and paid by the Grantee in carrying out the Multi-Year Study pursuant to the terms and conditions as set forth in the Grant Agreement, up to a total of $50,000. The remaining two-thirds of such costs and expenses not reimbursed represents the Grantee’s match requirement of $2 for every $1 in Grant Funds.

1. For purposes of this request, the Grantee has incurred and paid from its own source of funds costs and expenses in carrying out the Multi-Year Study in the total amount of $ ______________. Attached to this request are copies of the supporting documentation evidencing such costs and expenses and the payment of same. The supporting documentation must support the total amount listed.

2. The Grantee requests from Florida Housing $ ______________ reimbursement in Grant Funds (such amount represents no more than one-third of the total amount listed in 1. above).

The Grantee certifies to Florida Housing (a) that the costs and expenses for which it seeks reimbursement hereunder were incurred and paid by the Grantee in carrying out the Multi-Year Study, (b) that such costs and expenses were reasonably necessary for purposes of carrying out the Multi-Year Study as contemplated by and within the intent of the Grant Agreement, (c) that such costs and expenses were reasonable in amount and the result of good business practices where possible, availability of services and circumstances considered, and (d) that such costs and expenses are otherwise eligible for reimbursement with Grant Funds under the terms of the Grant Agreement.

The Grantee further certifies to Florida Housing that:

(f) If a state university is part of the Grantee’s research team, the indirect cost percentage assessed by that university is limited to no more than 10 percent for the portion of the work carried out that is funded through the Grant Agreement; and
REQUEST FOR REIMBURSEMENT AND CERTIFICATION
To Be Submitted with Each Request for Reimbursement

(g) The Grant Funds may not be used by the Grantee to pay for the Grantee’s internal staff or operations related or unrelated to the Multi-Year Study, even if Grant Funds would be used to pay for the staff’s time on the Multi-Year Study.

Dated this ___ day of ________________, 20___.
