

## 2022 Florida RECAPs\*

### **Note Regarding 2022 RECAP Designations:**

In December 2021, the Census Bureau announced it would delay the release of the 2016-2020 ACS 5-year data due to the impacts of COVID-19 on data collection. Consequently, Florida Housing has used the average of the three most recent and available 5-year averages, which includes survey data from seven years (2015-2019). In addition, Florida Housing has discarded high margin of error values. Applying these rigorous standards, Florida Housing has based the RECAP designations on accurate data which reflect long term trends.

The race and ethnicity data in the 2019 American Community Survey 5-year estimates have many high margin of error values. As a result, Florida Housing has excluded these variables for numerous census tracts using the same methodology as 2021. Although poverty remains near its peak level overall, it has declined slightly in high incidence tracts.

\*Racially/Ethnically Concentrated Areas of Poverty have an incidence of poverty equal to or greater than 40% and a minority concentration greater than 50%. Data are derived from the average of the three most recent and available 5-year averages of the American Community Survey. High margin of error values are excluded.
