

## 2023 Florida RECAPs\*

### **Note Regarding 2023 RECAP Designations:**

The race and ethnicity data in the 2021 American Community Survey 5-year estimates have many high margin of error values. As a result, Florida Housing has excluded these variables for numerous census tracts. Although poverty remains near its peak level overall, it has declined slightly in high incidence tracts. The convergence of these two trends leads to fewer RECAPs in 2023 than there were in 2022.

In 2022 and 2021 there were 47 RECAPs. Of those, 15 remain RECAPs in 2023. Among the 32 tracts which dropped out, 22 dropped because of declines in poverty levels and 4 tracts were excluded due to high margin of error values. There are also 25 new tracts which meet the RECAP criteria in the updated dataset which were not RECAPs in 2022 and 2021. They are all solidly minority-majority tracts that appear to have had marginal increases in poverty and the minority population which put them over the threshold. Overall, there are 20% fewer RECAP tracts in 2023 than in 2022 and 2021.

Every ten years, the U.S. census tract boundaries are re-evaluated by the Census Bureau to align with any major changes in the US population. Because of this, some census tracts are grouped together, while others are split into multiple tracts to accommodate population growth or new housing built in the past 10 years. As a result of the 2020 decennial census there are now 5,160 census tracts in Florida compared to 4,245 tracts in 2019.

\*Racially/Ethnically Concentrated Areas of Poverty have an incidence of poverty rate equal to or greater than 40% and a minority concentration equal to or greater than 50%. Data are derived from the most recent 5-year American Community Survey. High margin of error values are excluded.
